* Compact Motor™ speed is proportional to the finger pressure applied to the push button.

** Additional push button can be added anytime by connecting in parallel, unless switches are digital.

Where digital switches are used (e.g. Compact Motor™ winches) the additional push button (available for all sizes 28ST-62ST) must be specified with the original order.

Information for non-Andersen product above is as per the manufacturers' website or catalogue at time of publishing.
