

E40i

electric winch

E40i - The easily placed electric winch

The coach roof is the normal place for a winch that operates halyards, reef lines, outhaul and control lines.

The E40i winch is built up around an electric motor which is totally integrated in the drum. Only three thin cables are protruding to lead through the coach roof or the deck, no large cutouts and no external motor or gearbox.

This makes for uncompromised headroom down below.

No sweat

Hoisting your main will no longer be a struggle. Self-tailing function and 3-speed operation makes E40i ideal for any line where you need the combination of speed and fine-tuning.

Scan and watch
Synchronized Main
Furling

E40i is powered up by Seldén's SEL-Bus system and a Power Supply Unit converting 12/24V to 42V which makes for an efficient and compact design. An interplay between E40i and Seldén's electric furling mast forms the ingenious **Synchronized Main Furling** system developed by Seldén. Press one button and E40i will tension the outhaul simultaneously as the mast motor unfurls the sail from the mast.

Art. No.	E40i
471-540-10	Stainless drum
471-540-20	Aluminium drum

TECHNICAL SPECIFICATION

Base dia, Ø mm	167
Drum dia, Ø mm	128
Height, mm	198
Weight, kg	Stainless: 10,7 Aluminium: 8,8
Line entry height, mm	60
Line entry angle	5-10°

E40i is a multi purpose winch for any 8-14 line with a 5-10° line entry angle.

Operation	3-speed
Line speed, m/min	High speed: 17 Intermediate speed: 11 Low speed: 6,5
Line size, Ø mm	8-14
Power consumption, W	1200
Cable size, mm ²	6
Voltage	42
Power consumption (no load)	12V: 15 A 24V: 7 A
Current consumption (nominal), A	12V: 15 24V: 7

Ordering E40i

Contact an authorized Seldén dealer for a quote including SEL-Bus and Power Supply Unit.
