T38 & T50 deck organisers

the experts in rope holding
spinlock

Installation

- Plan layout of deck before marking out holes.
- The vertical rope-entry angle should be less than 10°.
- Install the organiser on an imaginary line bisecting the angle of rope lead (see illustration).
- Ensure deck has the required strength.
- Drill holes (ø8.5mm or 11/32" for the T-50, and ø6.5mm or 1/4" for the T-38).
- Do not try to bend the organiser to fit deck curve, but use a shaped hardwood pad.
- Seal deck joint using a silicone rubber sealant.
- Insert flush fitting countersunk fasteners, before fixing to deck.
- For maximum safety, use A4/70 A4/80 high tensile fasteners.

Note: Diameter of the T-50 sheave: 50mm
Diameter of the T-38 sheave: 38mm.

Important:

Each organiser requires a fastener at either end, AND one through each sheave i.e. a 3 sheave organiser will require 5 fasteners.

How to use

The sheaves are specially moulded in a composite material to provide low friction even at high loads. The durable stainless steel axle acts along with the countersunk fasteners to provide a high strength / low weight construction.

To ensure the maximum life:

- Do not allow loaded halyard to come into contact with the metal body.

Maintenance

Spinlock products are made from the best quality materials for dura-

customer contact

IMPORTANT

Chacun de nos produits est destiné à un usage spécifique qui doit être conforme à nos recommandations. En cas de doute vous devrez solliciter un détaillant ou un distributeur autorisé Spinlock pour obtenir des informations détaillées sur l'utilisation de ses produits.
